

## Error log chapter 6

### Exercise 1:

#### Error 1:

1:

```
ERROR!  
Main.java:6: error: ';' expected  
    addRoof()  
ERROR!  
           ^  
Main.java:7: error: ';' expected  
    addBase()  
           ^  
ERROR!  
Main.java:8: error: ';' expected  
    addWalk()  
           ^  
  
3 errors  
  
=== Code Exited With Errors ===
```

2:

3 Errors stopped my code from running properly

3:

Missing semi-colon

4:

```
class Main {  
    public static void main(String[] args) {  
        addRoof()  
        addBase()  
        addWalk()  
    }  
}
```

5:

Adding the 3 missing semi colons

6:

```
class Main {  
    public static void main(String[] args) {  
        addRoof();  
        addBase();  
        addWalk();  
    }  
}
```

Error 2:

1:

```
ERROR!  
Error: Main method not found in class Main, please define the main method as:  
    public static void main(String[] args)  
or a JavaFX application class must extend javafx.application.Application  
  
=== Code Exited With Errors ===
```

2:

The house did not appear

3:

All of the methods were private

4:

```
private static void main(String[] args) {
```

5:

Made the main one where it calls the other ones public

6:

```
public static void main(String[] args) {
```
