Error log chapter 3

Exercise 4 error log

No errors

Exercise 7 error log

```
1  // Online Java Compiler
2  // Use this editor to write, compile and run your Java code online
3  import java.util.Scanner;
4  class Main {
5      public static void main(String[] args) {
6          Scanner scanner = new Scanner(System.in);
7
8          System.out.println("Input your 3 digit number");
9          scanner.nextInt();
10
11         hun = scanner % 100;
12     }
13 }
```

```
ERROR!
Main.java:11: error: cannot find symbol
        hun = scanner % 100;
        ^
  symbol:   variable hun
  location: class Main
ERROR!
Main.java:11: error: bad operand types for binary operator '%'
        hun = scanner % 100;
                      ^
  first type:  Scanner
  second type: int
2 errors

=== Code Exited With Errors ===
```

My scanner.nextInt(); doesn't have a variable defining it and also my variable "hun" has no defined data type making error messages happen every time I run it

```
int input = scanner.nextInt();

int hundred = input / 100;
```

Input put as scanner's variable and int was put in front of my "hundred" variable
